Forecast for Friday 13 Nov 2020

Weather: Some rain at first but soon clearing then a cold and windy day with sunny periods and occasional showers, these falling as snow above 800 to 1000 metres with some hail mixed in too. Showers will turn heavier from late afternoon and early evening, especially across the west, before easing off. Best of the drier and brighter conditions likely to be across the Angus hills and Deeside.

Chance of cloud free mountain/hill tops above 800m: 20% at first with cloud down to 450m, but chance soon increasing 70%, with cloud lowering to 600 metres in and around showers, this most extensive across the southwest of the area where it may linger at times. Best of the cloud free summits in the east.

Visibility: Only a few kilometres in places at first, but generally very good with good air clarity outside of showers and cloud.

Met Office Aberdeen Meteorologist's View
Be prepared for wintry conditions at higher elevations at times with some fresh accumulations of lying snow in places. Gusts to 60 mph possible on the Cairngorm Plateau.

Forecast for Saturday 14 Nov 2020
Weather: A cloudy and windy day with rain at times. Sheltered ranges across the northeast may only see small amounts of rain.

Maximum wind: Southerly winds gusting to 50 to 60 mph on summits making for slow progress

Chance of cloud free mountain/hill tops above 800m: 30%. Extensive cloud down to 600 metres shrouding most summits for much of the time, but some breaks possible from time to time in the northeast.

Visibility: Rather hazy in rain

Temperature: **Glens:** Plus 4 rising to 12 Celsius
At 800m: Plus 6 Celsius
Freezing level: Rising above summits in the early hours
